Introduction

Uninstall Gold is system software designed to remove remnants of unneeded programs on personal computer. Normally, **Uninstall Gold** scans personal computer and shows all found files, folders and registry items for users to find the desired programs to uninstall. Uninstall Gold still offer hiding function, with this function, users can hide system path and screen saver applications to avoid removing important application.

Unlike other uninstall software, **Uninstall Gold** can remove unneeded program completely, even the remnants of folders or broken registry keys. It's more convenient, faster and secure for users to clean their computer. Still, **Uninstall Gold** offers some hotkeys for users to operate easily and fast. It's built-in Startup items make users know more about the programs that are automatically started by Windows.

Advantages of using Uninstall Gold

- Friendly and easy to use Interface.
- List all installed programs, system updates and screen savers quickly.
- Backup the registry info of all installed programs.
